

Deepak P. Morey

Assistant Manager

STEM Robotics Coach

Navi Mumbai, Maharashtra, India

deepakmore2121@gmail.com +91 7507793077

GitHub LinkedIn Portfolio

Professional Summary

Versatile Software Engineer with 1 years of experience in software development, embedded systems, and full-stack projects. Proficient in C, C++, Python, and JavaScript with strong understanding of data structures, algorithms, debugging, and system design. Experienced in embedded Linux, RTOS, device drivers, and developing scalable software solutions. Eager to contribute to Android application development and large-scale systems at Google.

Education

Bachelor of Engineering in Electronics and Power

PLITMS, Buldhana, Maharashtra

2015 – 2020

CGPA: 8.85 / 10

Technical Skills

Programming Languages:

C (85%), C++ (75%), Python (70%), JavaScript (55%), Java (beginner)

Software Development:

Data Structures & Algorithms (75%), Debugging & Performance Analysis (70%), Unit Testing & Code Reviews (65%)

Embedded Systems:

Embedded C (80%), RTOS (65%), Linux Kernel (Basic) (60%), Device Drivers (50%)

Interface Protocols:

UART (80%), SPI (70%), I2C (70%)

Tools & Platforms:

Android Studio (basic), Arduino IDE (80%), VS Code (75%), Git (70%), MATLAB/Simulink (50%)

Web Development:

React.js (50%), Express.js (45%), MongoDB (45%), SQL (30%), HTML/CSS (65%)

Professional Experience

STEM & Robotics Educator

Jun 2023 – Present

Learning Link Foundation, Navi Mumbai, Maharashtra

- Designed and delivered embedded programming and software development courses using C, Python, and Arduino, impacting 100+ students.
- Led curriculum development incorporating data structures, algorithms, and debugging best practices.
- Coordinated projects with cross-functional teams ensuring successful execution and student engagement.

Robotics Trainer

Aug 2022 – Jun 2023

Seva Sahyog Foundation, Panvel, Maharashtra

- Facilitated hands-on embedded systems and microcontroller programming sessions focusing on UART, SPI, I2C protocols.
- Mentored students in project design, debugging, and testing, improving problem-solving skills by 30%.

Production Engineer

Dec 2020 – Jun 2022

Swati Switchgears Pvt. Ltd., Ahmedabad, Gujarat

- Assembled and tested high/low tension electrical control panels; improved production quality by streamlining test protocols.
- Collaborated with design and QA teams to troubleshoot hardware/software integration issues.

Key Projects

AI Chatbot for Student Learning Assistance

Dec 2025

Python (50%), OpenAI API (30%), JavaScript (20%)

- Built an AI-powered chatbot to assist students with coding, robotics, and STEM learning queries.
- Integrated conversational AI APIs with web interface for real-time educational support.

ESP32-Based Robotic Arm with AI Object Sorting

Nov 2025

ESP32 (40%), Servo Motors (25%), OpenCV (20%), Python (15%)

- Developed a robotic arm capable of AI-based object detection and automated sorting using camera input.
- Integrated servo control and computer vision for smart industrial automation tasks.

Autonomous Mobile Robot using ESP32 with SLAM and Sensor Fusion

Sep 2025

ESP32 (35%), Robotics (30%), IMU/LiDAR Sensors (20%), Python (15%)

- Designed an autonomous robot using ESP32 with sensor fusion from IMU and ultrasonic/LiDAR sensors for navigation.
- Implemented basic SLAM concepts for obstacle detection, path planning, and autonomous movement.

ESP32-S3 Smart Vision System with On-Device Object Detection

Jul 2025

ESP32-S3 (40%), TensorFlow Lite (25%), OpenCV (20%), Embedded C (15%)

- Developed an embedded vision system using ESP32-S3 and camera module for real-time object detection.
- Implemented on-device inference for low-power intelligent surveillance and smart monitoring applications.

URL Shortener Web App

Apr 2025

Node.js (40%), Express.js (20%), MongoDB (25%), EJS (15%)

- Built a full-stack URL shortener supporting QR code generation, robust API error handling, and scalable backend.

Music Player Web Application

Feb 2025

HTML (30%), CSS (30%), JavaScript (40%)

- Developed an interactive music player with playlist and animation controls for smooth user experience.

Three Phase Fault Detection with GUI

May 2023

MATLAB (60%), Simulink (40%)

- Developed a real-time fault detection simulation and GUI to monitor electrical parameters and diagnose faults instantly.

Automatic Solar Grass Cutter

Jul 2020

Arduino (80%), Embedded Logic (20%)

- Created solar-powered autonomous grass cutter integrating sensor data and motor control.
- Published paper in IJRESM journal [here](#).

Certifications

Full Stack Web Development

Coding Ninjas, Feb 2023 – Feb 2024

Topics: Python, Data Structures & Algorithms, Frontend, Backend, Git, OOP, Soft Skills

- Certificate 1
- Certificate 2
- Certificate 3 (DSA)
- Supporting Documents
- **Google for Education Certifications:**
 - Google for Education Certified Educator Level 2
 - Google for Education Certified Educator Level 1
 - Google AI for K12 Educators
- Soft Skill Development by Hablar

Achievements

- Published research on solar-powered automation in IJRESM (2020).
- Spearheaded STEM education projects impacting underserved communities.
- Proactive collaborator with experience in code reviews and agile teamwork.
