

Sachin Kumar

Robotics Specialist | STEM & AI | IoT Expert
India | +91 7892355212 | sackm123@gmail.com

Professional Summary

Highly motivated Robotics Specialist with 4+ years of experience in STEM education, robotics training, and IoT system development. Proven ability to design curriculum, train educators, and implement hands-on learning programs across multiple institutions. Strong expertise in Arduino, ESP8266, automation systems, and AI-based learning modules.

Core Competencies

Robotics Training & Development, IoT Systems (ESP8266, Sensors), AI & Basic ML, Arduino Programming, Curriculum Design, Trainer Development, Project-Based Learning, Excel Analytics, Leadership & Coordination

Professional Experience

Training & STEM Program Lead – iSpark Learning Solutions (2025–Present)

- Designed and executed large-scale STEM training programs across schools
- Developed robotics, AI, and IoT curriculum modules
- Conducted onboarding and upskilling sessions for trainers
- Created SOPs, training manuals, and evaluation frameworks
- Monitored trainer performance and training effectiveness
- Managed scheduling, batch planning, and resource allocation

STEM Trainer & Program Coordinator – Aaklan Robotics (2024–2025)

- Delivered robotics curriculum across Grades 1–8
- Guided students in building real-world projects
- Conducted assessments and performance analysis
- Supported trainer coordination and program scaling

Robotics Trainer – Mount Litera Zee School (2023–2024)

- Delivered robotics and coding programs using Arduino kits
- Conducted hands-on IoT and automation sessions
- Designed project-based learning activities
- Maintained student performance data

Robotics Trainer – Sreeja International School (2022–2023)

- Conducted robotics lab sessions and guided IoT projects
- Improved student engagement through experiential learning
- Collaborated with faculty and management

Key Projects

- IoT Temperature Monitoring System (ESP8266 + DHT11)
- Bluetooth Controlled Car (Arduino + HC-05)
- Ultrasonic Radar System using Processing
- Home Automation using IoT
- Robotics Models: Crane, Rover, Forklift

Key Achievements

- Successfully implemented robotics programs across multiple schools
- Developed Excel dashboards for performance tracking
- Improved student engagement through hands-on learning
- Mentored multiple trainers and students

Education

Master of Computer Science

PGC Nanoscience & Technology – Duke University

B.Tech – Electronics & Communication Engineering

Technical Skills

Arduino, ESP8266, Sensors, IoT Systems, AI Basics, Excel Dashboards, LMS Tools
