Primary Logo Placement
(to be used as much as possible
across all communication)

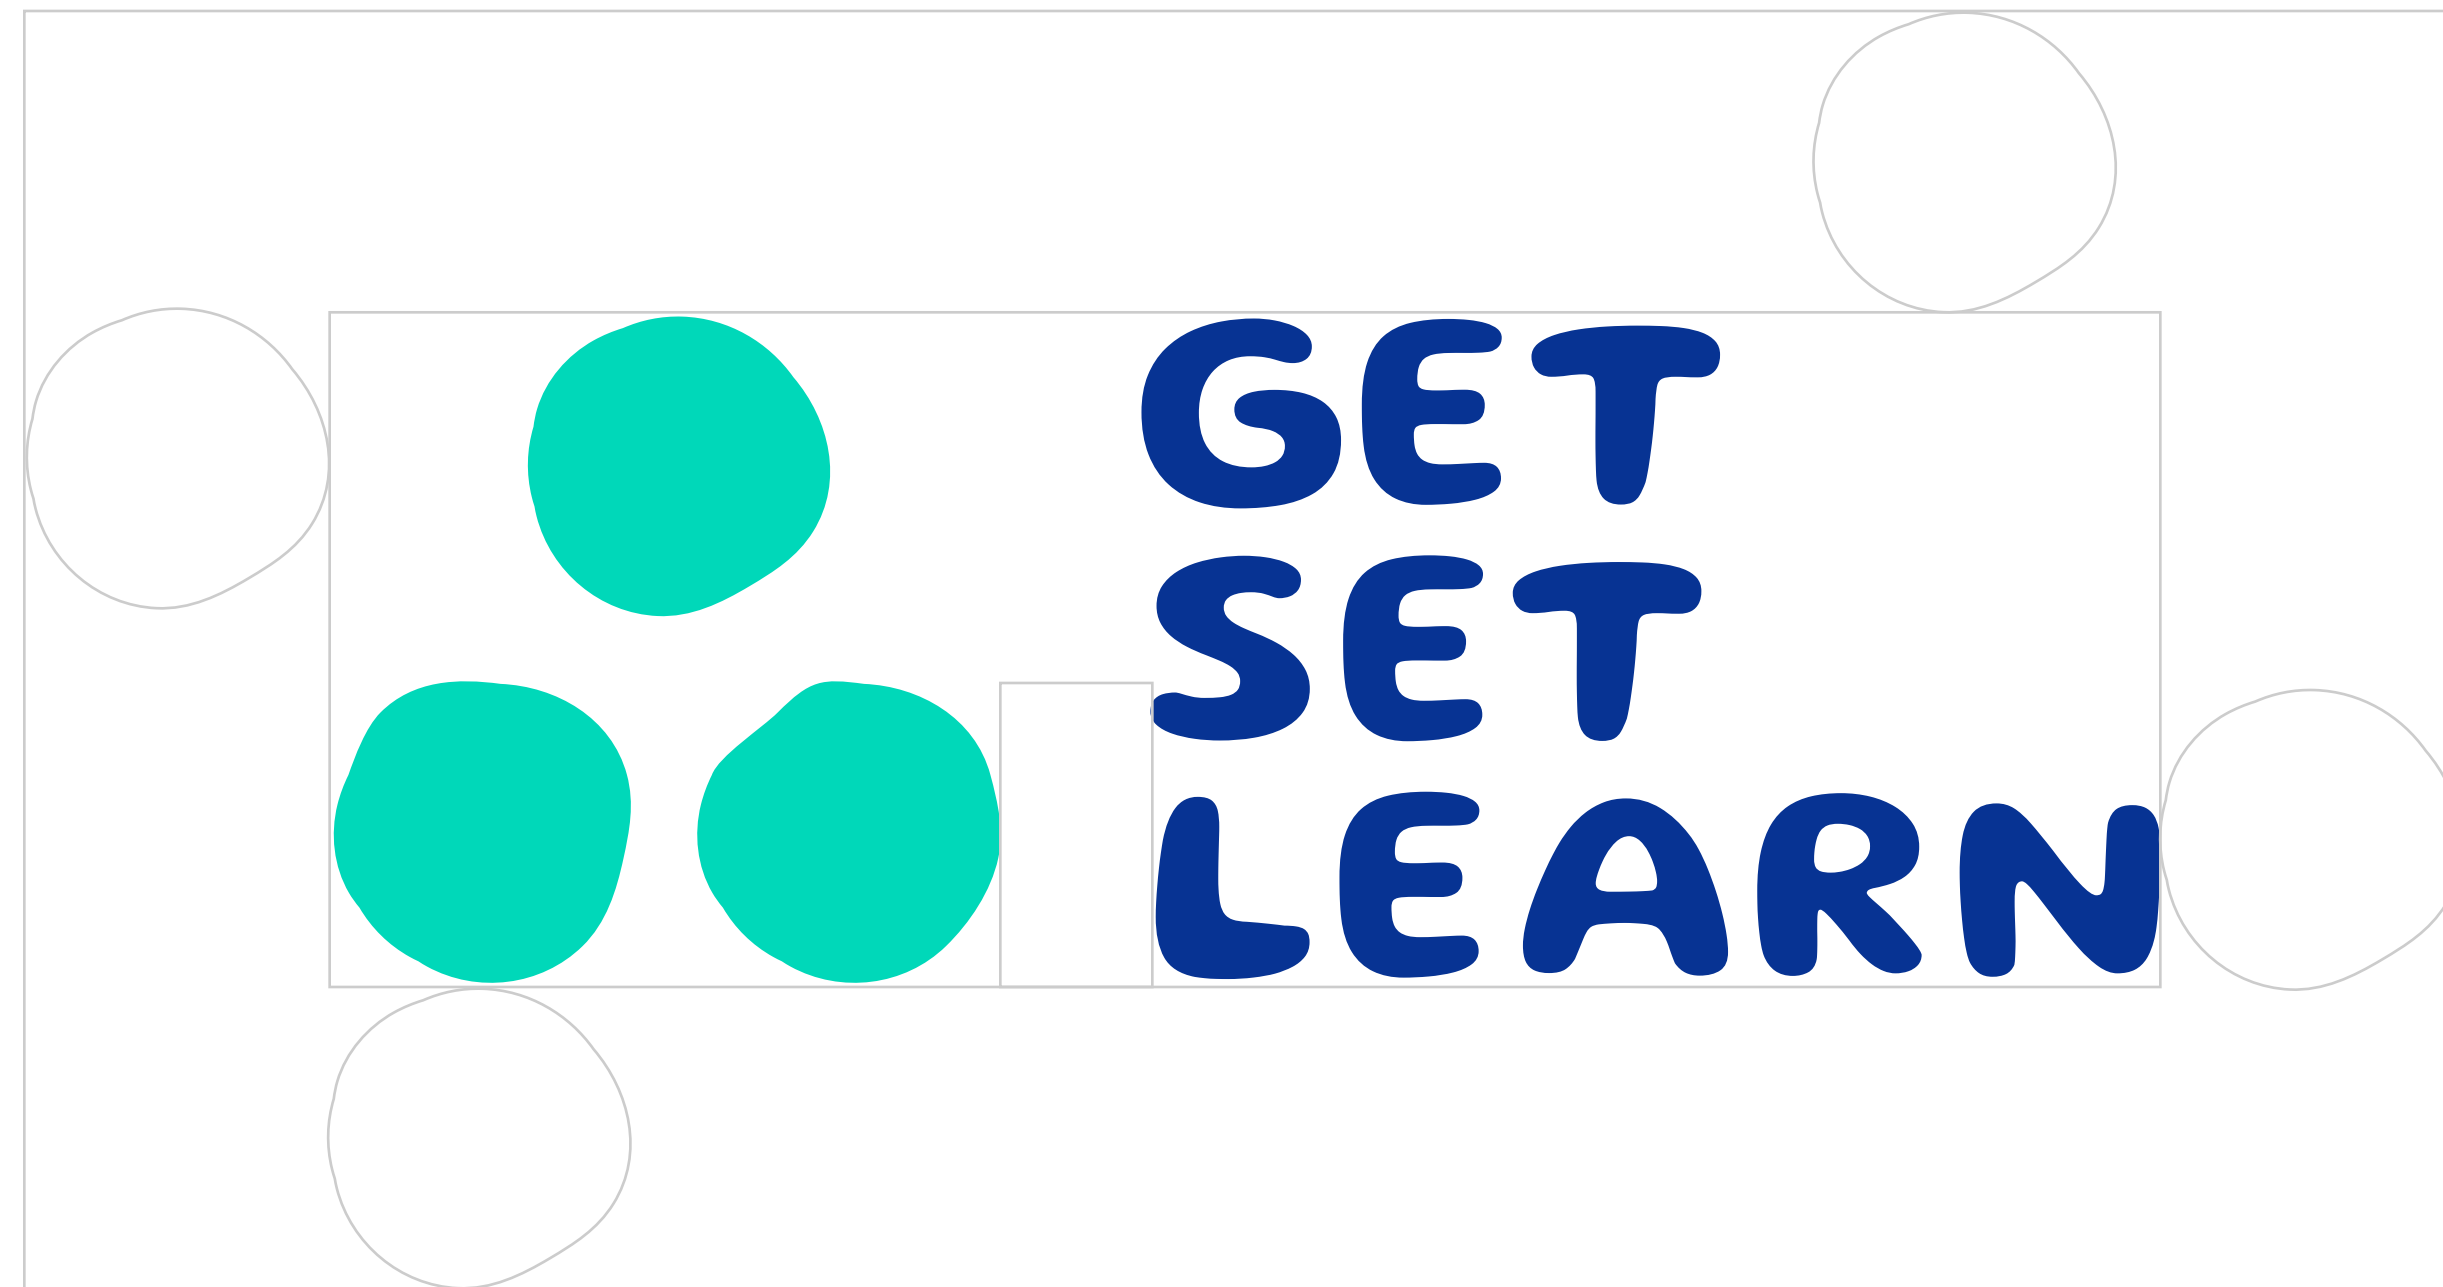

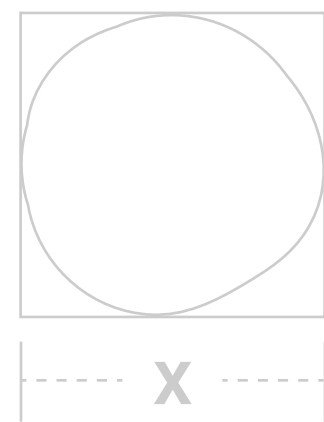

Tertiary Logo Placements
(to be used in case of extreme space
constraints, or in the case of app icons, etc.)

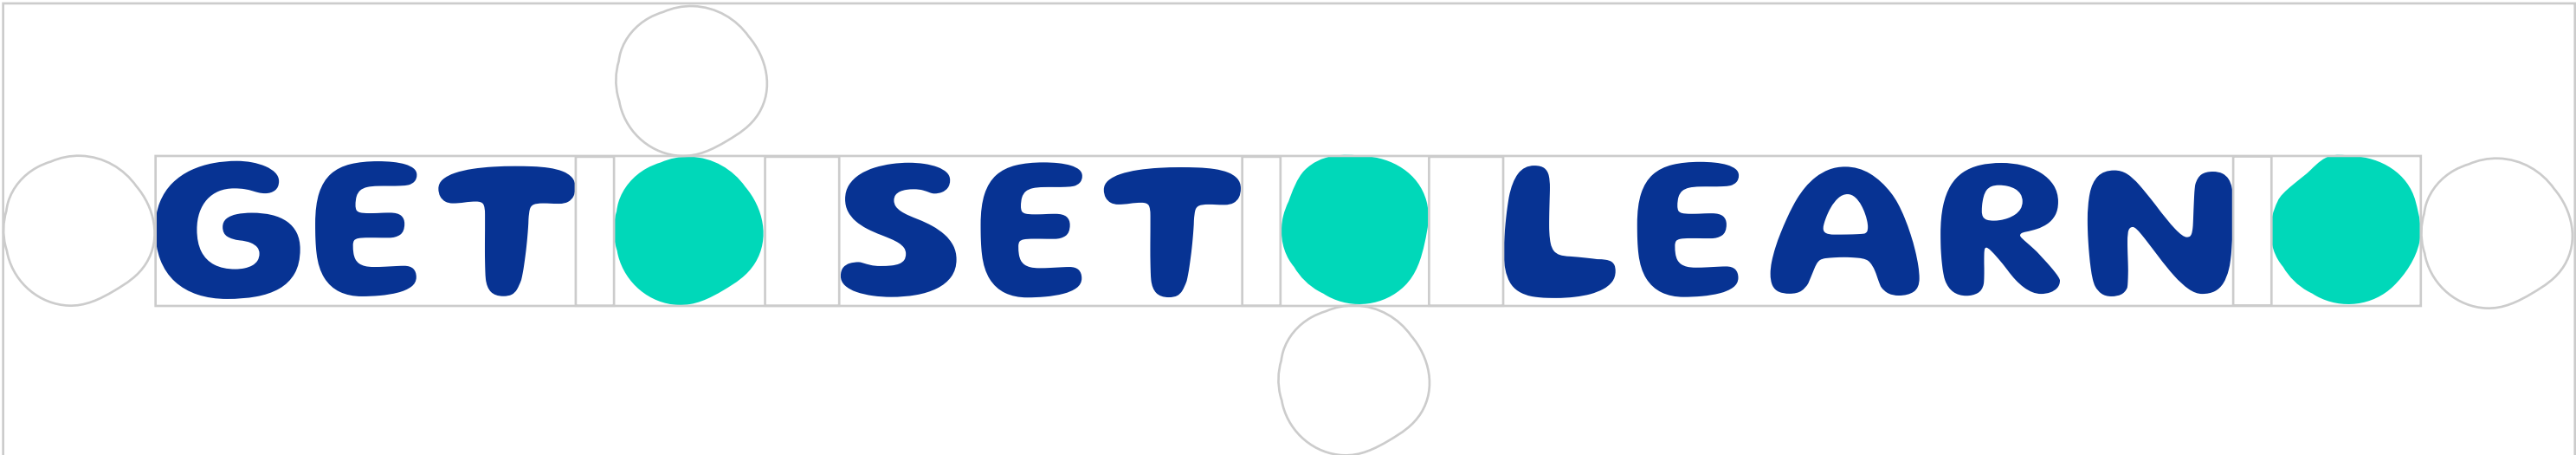

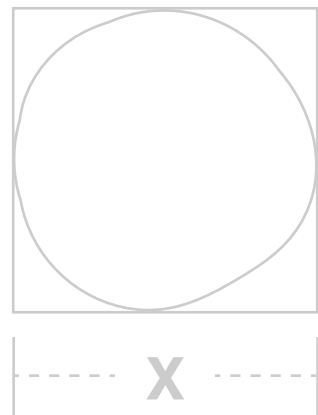

Secondary Logo Placement
(to be used when communication
doesn't allow)

The minimum space around the logo should be equal to the size of the top circular shape in the logo mark (represented by x).
The space between the logo mark and the name is equal to half of the top circular shape from the logo mark ($0.5x$).

The space between the logo marks and the words is equal to quarter of the top circular shape from the primary logo (0.25x).

PRINT

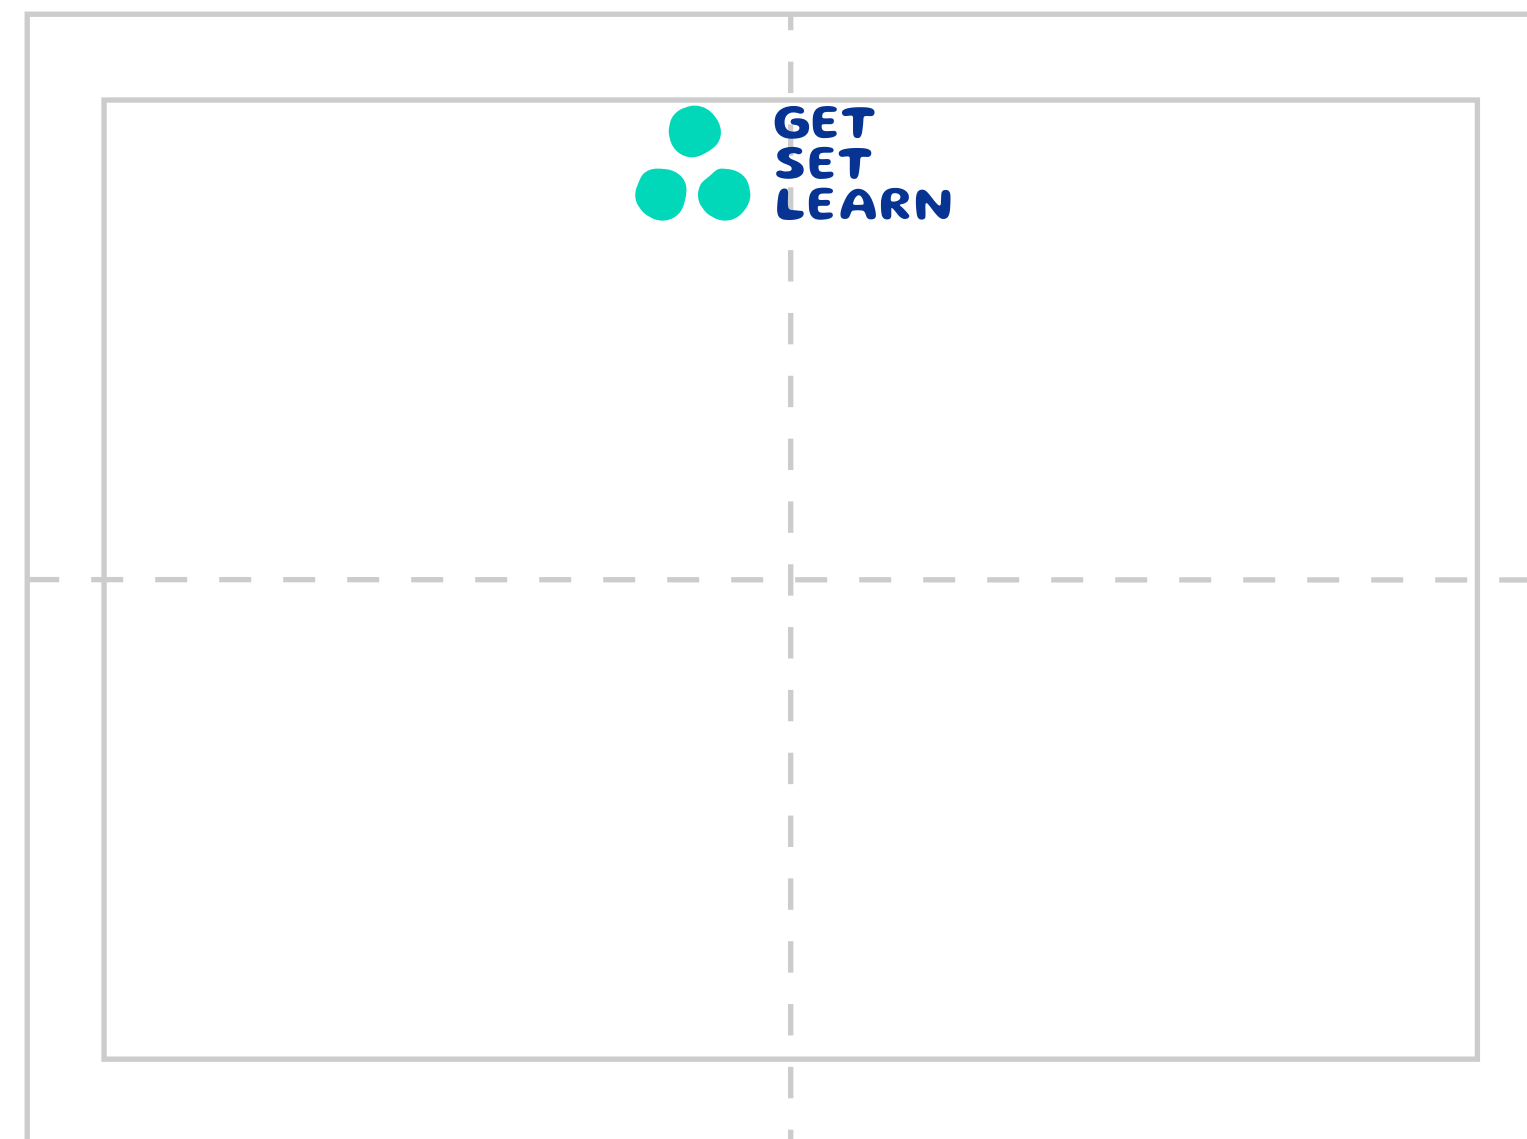

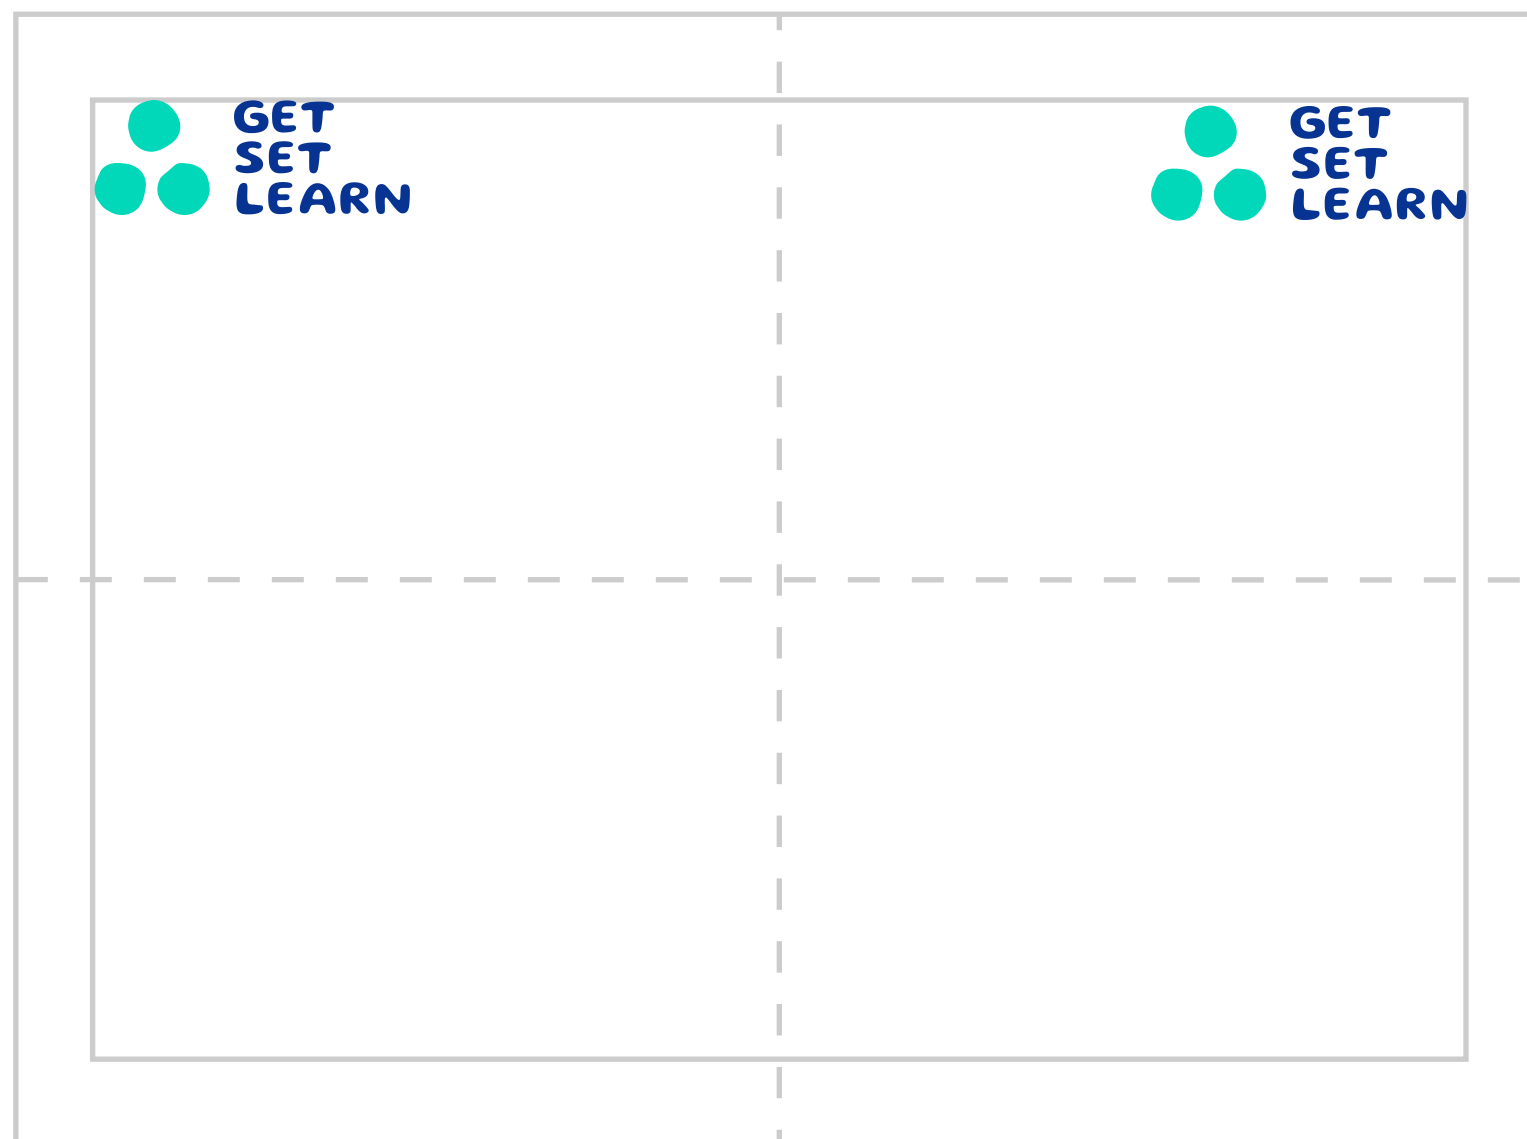

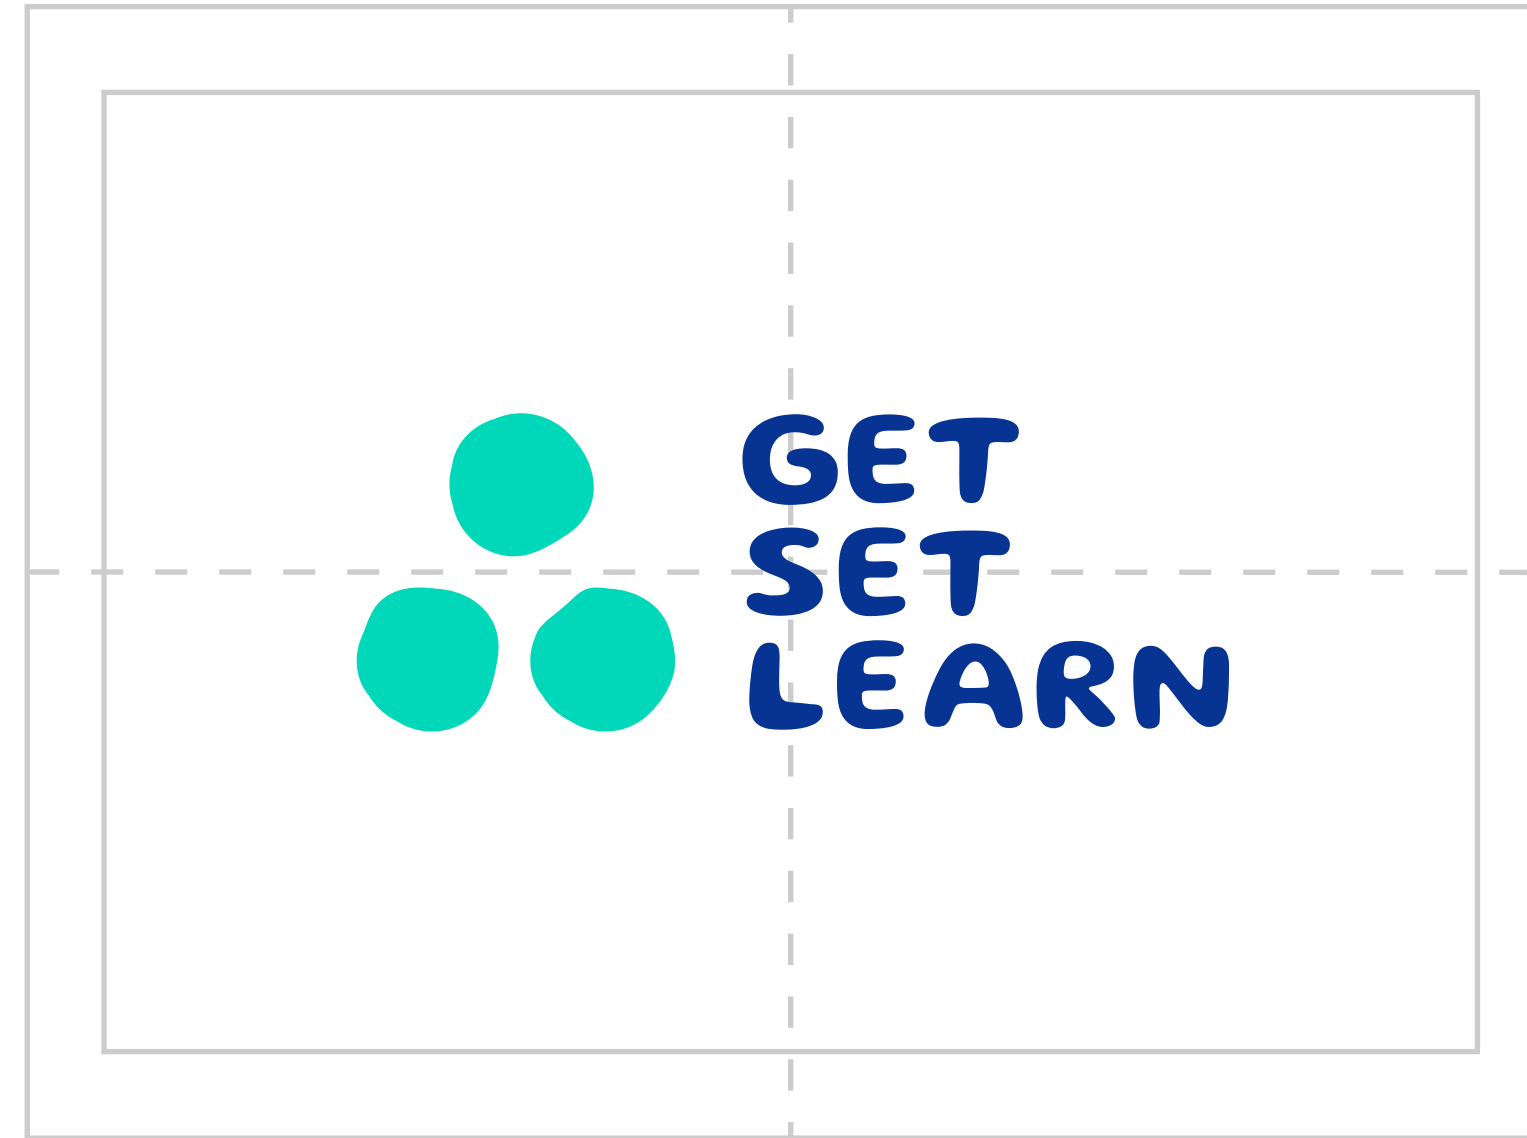

Example of placement of logo according to the guideline in the previous pages.

This minimum space will apply even when the logo is placed in any other corner of the communication.

GENERAL POSITIONING

This general guidance applies to digital or print applications, including both portrait and landscape orientations.

When creating a composition, place the logo in one of the two corners, or center it on the central vertical axis. Take advantage of the space and make the logo as large as possible. Remember: Be bold, be proud, make it big!

Avoid using the logotype at sizes smaller than one-third of the canvas width.

Do follow the right placement and clear space guidelines of the logo.

Do check alternate placement guidelines when placing the logo on a color background.

DO...

When placing the logo on a brand color background, do make sure to follow the right placement guidelines.

Do put the black logo on a completely white background in the case of a black & white layout.

Do place the logo on images in a way that allows for max readability of the logo.

Do not add shadows to the logo.

Do not modify the logomark or the name in any way.

Do not change the colors of the logos other than the specified color guidelines.

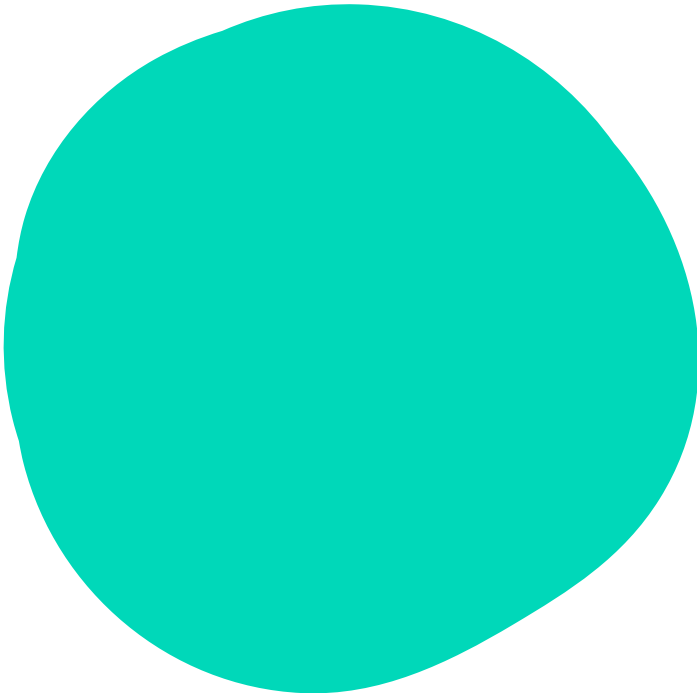

Do not put the logo on any background color other than the specified guidelines

Do not skew or modify the logo in any way.

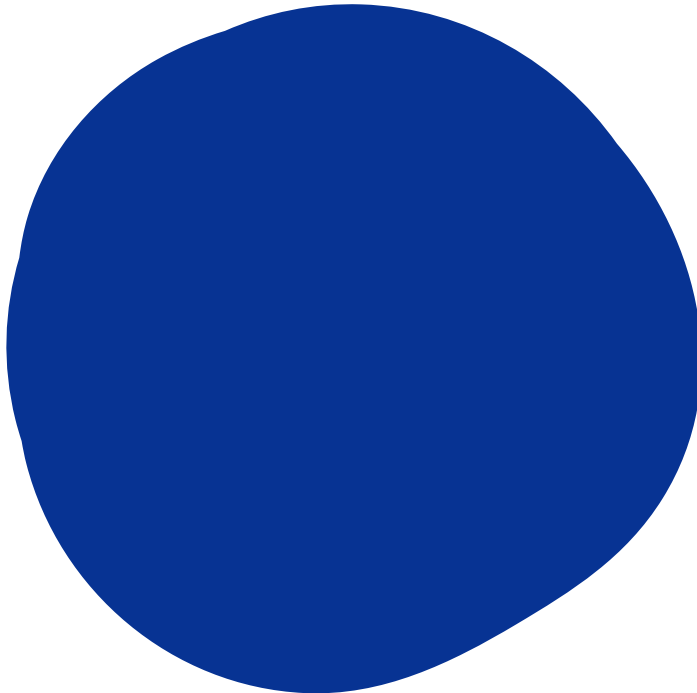

Do not place the logo in any way that compromises the readability of the logo

Turquoise Sea and Azure Blue are the two primary colors as seen in the Get Set Learn Logo.

A cooler tone of black and white is used to give a futuristic feel.

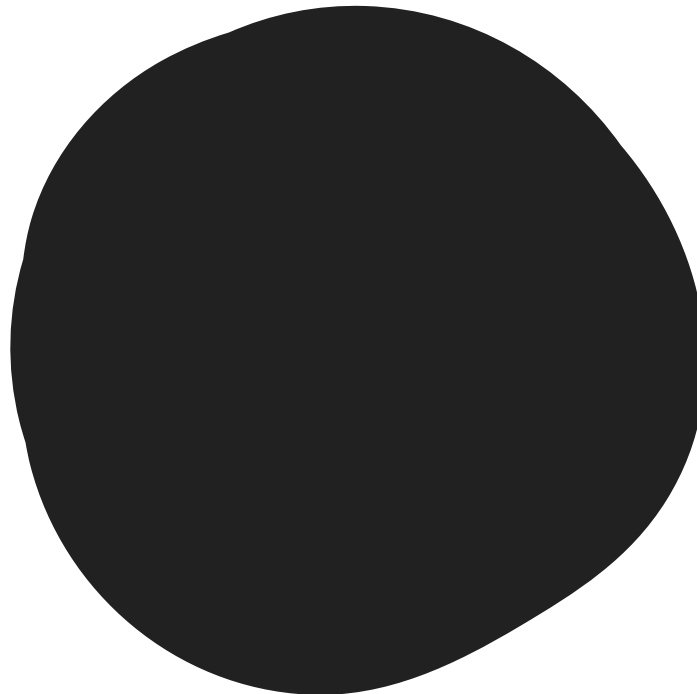

Black is commonly used for typography.

White can be used as a primary background color.

0% ORIGINAL COLORS

On an average, the aim should be to use colors judiciously so as to keep a balance between the primary, secondary and tertiary colors - in turn maintaining the balance of the brand's identity.

As shown in the pie chart (approx) -

The primary color usage should be about 60%

The secondary color usage should be about 30%

The tertiary color usage should be about 10%

These values can be alternated only when absolutely necessary for layout.
