WITTY International School

- Grade 5 to 7 Cambridge Biology Teacher

CERTIFICATIONS

- Extension CAIE Training for Teaching IGCSE Biology
- Extension CAIE Training for Teaching ALevel Biology
- Extension CAIE Training for Teaching ALevel Global Perspectives
- MISA training for Global Perspectives and Research

RESEARCH FOCUS

My immediate goal is to research the alternative assessment models I experienced at UCLL Leuven for my M.Ed. dissertation. I aim to analyze their potential application within the Indian system, exploring how they can foster holistic learning and critical thinking. This work is driven by a commitment to develop practical assessment frameworks that align with the transformative vision of NEP 2020, moving education beyond rote memorization towards authentic student development.

FUTURE GOALS

My next objective is to lead the creation of an education model that incorporates education and assessment with emotional growth. The semester I spent at UCLL College, Lueven, Belgium was transformative and made me understand the importance of collaborative and student-centric learning, a method very much in line with India's NEP 2020. I intend to utilize these understandings to spearhead educational projects that organically integrate social-emotional learning (SEL) with the core curriculum thus ensuring, the growth of resilience, empathy, and self-awareness at the same level of academic achievement.

TEACHING LEARNING PHILOSOPHY

My educational philosophy is a unique blend of Experimentalism and Realism, fostering dynamic, inquiry-based classrooms where students design experiments and tackle real-world problems, while ensuring learning is grounded in tangible, measurable outcomes and curriculum standards.

To cite an example, experimentally speaking, we have the entire genetic make-up for a T. rex, but our experience with realism teaches that brining it to life would be a bad idea.
