Profile Summary:

an Electrical Engineering Graduate with a strong academic foundation. Proven ability to apply technical knowledge to innovative solutions, demonstrated through projects like the EMG Sensor-Controlled Prosthetic Arm and Li-Fi system development. Seeking to contribute problem-solving skills and technical proficiency to a dynamic engineering team.

Education:

Bachelor of Electrical & Electronics Engineering, PDA College of Engineering,

Kalaburagi, Karnataka | Feb 2022 – Jul 2025 with (6.70 CGPA)

Diploma in Electrical & Electronics Engineering, Department of Technical Education,

Bangalore, Karnataka | Aug 2017 – May 2021 with (61.41 %)

Technical Skills:

- **Engineering Softwares:** AutoCAD, REVIT & Etap(Ongoing), MS Office.
- **Core Concepts:** Electrical Machines, Power system Operation & control, Estimation & Costing, Maintenance and More.

Key Projects:

Prosthetic Arm using EMG Sensor

- Developed an advanced prosthetic arm utilizing Electromyography (EMG) sensors for individuals with limb loss or congenital physical disabilities to restore arm mobility through intuitive control.
- Captured electrical signals from muscle contractions and translated them into precise motor movements
- Delivered a cost-efficient solution, successfully reducing overall production costs by **20%** compared to traditional prosthetic options.

Light Fidelity /(Li-Fi) System

- Engineered and implemented a Li-Fi system utilizing Visible Light Communication (VLC) technology for high-speed, secure data transmission.
- Utilized LED technology and photodetectors for transmitting and receiving data signals, resulting in low latency and high reliability.
- Achieved data transfer rates up to 224 Gbps during rigorous testing, showcasing the technology's potential as a high-speed alternative to Wi-Fi systems.
- Demonstrated technical leadership by integrating complex hardware components and troubleshooting system issues.

Internship Experience:

Kailash Transformer's Pvt Ltd -Kalaburagi from (Oct2024 – Jan2025 / 16

Weeks)

- Gained hands-on experience in various stages of transformer production including core winding, coil manufacturing, and insulation technique.

- Developed understanding of transformer applications in power transmission and distribution systems.
- Conducted performance testing on transformers under supervision & Safety standards.

GESCOM, Kalaburagi on (Aug 2023/ 4 Weeks)

- Gained hands-on experience overseeing GIS station activities and supervising operations at the 33/11KV sub-station.
- Collaborated with senior engineers to identify and resolve technical issues, enhancing operational efficiency and system reliability.

Professional Training:

Karnataka German Training Technical Institute From (Sept 2022 – Oct 2022)

- Completed rigorous training in motor and pump maintenance, focusing on diagnostics, repair, and performance optimization.
- Developed expertise in troubleshooting mechanical and electrical issues, gaining proficiency with specialized tools and safety protocols.

Achievements/Certifications:

- Soft Skills Online Certification Course in (Swayam NPTEL)
- Prosthetic Arm Using EMG Sensor By Journal of Emerging Trends in Electrical Engineering.
